Professional Summary

Technology Solutions professional with over 3 years of experience in corporate sales, understanding business challenges, and delivering solution-oriented services. Currently completing a Bachelor of Computer Science (Software Engineering) with hands-on experience in full-stack application development, cloud fundamentals, and API integration. Possesses a strong background in solution presentation, stakeholder management, problem-solving, and translating technical concepts into business value. Able to bridge business needs and technology solutions through strong communication and analytical skills.

Looking to build a career in Software Engineering, Solutions Engineering, Technical Implementation, or Technical Support, where both technical expertise and customer-facing experience can create measurable business impact.

Education

- **INTI International University, 2023–2026 (Ongoing)**
 - Bachelor of Computer Science (Hons), Major in Software Engineering
- **Nexperts Academy Sdn Bhd, 2022**
 - Microsoft Azure Fundamentals AZ-900 (Certification No: I475-6416)
- **SMK Tun Tuah, 2015**
 - STPM – Accounting Class

Technical Skills

- Cloud Fundamentals: Microsoft Azure (AZ-900), cloud service models (IaaS, PaaS, SaaS)
- Tools Awareness: CRM concepts, Git, REST APIs, basic database understanding
- Solution Knowledge: Web applications, APIs, system integration concepts
- Technical Communication: Translating technical features into business benefits

Project Based

Pos Management System (Final Year Project)

- Developed a full-stack restaurant management and food ordering system with role-based access control for Administrators and Waiters.
- Implemented order management, sales tracking, dashboard analytics, and restaurant operation workflows using React and TypeScript.
- Integrated Supabase Authentication and PostgreSQL database for secure user management and data storage.
- Built AI-powered business insights using Google Gemini AI to provide intelligent sales and operational analysis.
- Designed responsive user interfaces and interactive dashboards for enhanced user experience.
- Developed reporting features with PDF and Excel export functionality to support business reporting requirements.

Solar & Battery TNB Calculator

- Developed a web-based solar and battery ROI calculator to help residential and commercial customers estimate electricity savings and investment returns.
- Designed an interactive user interface using React and TypeScript to simplify complex energy consumption calculations.
- Implemented dynamic calculations for TNB tariff estimation, solar energy generation, battery storage capacity, and payback period analysis.
- Built customizable input parameters including monthly electricity usage, solar system size, battery capacity, and electricity rates.
- Generated real-time financial projections such as annual savings, ROI, and system breakeven period.

Smiley (Face Detection)

- Developed a full-stack web application using React, Node.js, and Express.js.
- Integrated Clarifai Face Detection API to analyze uploaded images and detect faces.
- Implemented user authentication and entry tracking using PostgreSQL.
- Deployed the application using Render.

Student Online Enrollment System (Second Year Project)

- Collaborated in a team project using ASP.NET and C#.
- Developed login, registration, and account management functionalities.
- Connected application features to a relational database for data persistence.
- Participated in system testing and bug fixing to ensure application reliability.

Personal Finance Tracker

- Built a personal finance dashboard using React, TypeScript, and Tailwind CSS.
- Implemented income and expense tracking features with responsive UI design.
- Integrated Supabase authentication and database services.
- Designed application wireframes and user interface prototypes using Figma.

Work Experience

Technical Sales Executive, Condition Zebra (M) Sdn Bhd (April 2026 – Present)

- Managed B2B client accounts and proposed cybersecurity solutions based on customer business requirements.
- Identified new business opportunities and generated sales pipeline through networking and prospecting.
- Assisted clients in understanding cybersecurity risks, compliance requirements, and security best practices.
- Conducted customer presentations, product demonstrations, and solution consultations.

Team Leader / Solar Sales Consultant, Alpha Solar Sdn Bhd (July 2024 – March 2026)

- Promoted to team lead role, coaching a 3-member sales team on lead qualification, objection handling, and closing strategies.
- Managed end-to-end B2B sales cycles for commercial and industrial solution-based projects.
- Conducted client requirement analysis, ROI/payback discussions, and solution proposal presentations to business decision-makers.
- Coordinated with engineering and operations teams to align technical feasibility, timelines, and customer expectations.
- Supported pipeline management through structured follow-ups and quotation customization.

Sales Executive, TCIM Sdn Bhd (Tan Chong Industries Machinery) (2023 – June 2024)

- Managed B2B sales cycles for industrial machinery solutions, working with operations and procurement stakeholders.
- Developed customized proposals aligned with client operational needs and budget constraints.
- Built long-term client relationships through consultative selling and post-sales follow-ups.
- Achieved consistent target performance in a structured, KPI-driven sales environment

Account Assistant, Covenant Logistics Sdn Bhd (Yunda Express) (2021 – 2023)

- Performed accurate financial data entry and assisted in report generation.
- Liaised with IT and finance departments to clarify and fulfill data requirements.
- Maintained organized records and improved data workflows.

Supervisor, Mei Grand Sdn Bhd (2016 – 2021)

- Managed a 15-member plantation team, overseeing daily operations and performance.
- Conducted staff training and ensured productivity and goal achievement.
- Provided continuous team support and resolved operational issues.
